## Working Paper for Draft Proposed International Standard for Information Systems— Programming Language C++

### Abstract

This document specifies the form and establishes the interpretation of programs expressed in the programming language C++. Its purpose is to promote portability, reliability, maintainability, and efficient execution of C++ language programs on a variety of computing systems.

**This document is subject to change without notice, and may not be referred to as a Standard until approved by an accredited standards body. Distribution of this document does not represent or warrant any degree of completeness or correctness of this document. This document is a working draft and is known to be incorrect, incomplete, and inconsistent.**
