

SGFS SUBGROUP ON TR10000 EXTENSION

## DRAFT RESOLUTIONS

The SGFS Authorized Subgroup recommends to SGFS that:

01. SGFS maintain a list of open and closed issues with regard to OSE related new work assigned by JTC 1;
02. SGFS request that NBs and liaison organizations encourage and enable user participation in the development of taxonomies and profiles, in order to capture users requirements in the most effective way;
03. SGFS request that SCs involved in developing profiles for specific application areas, and especially SC24, should comment on item 2 of the issues list that states that no new functionalities be added outside of the base standards;
04. SGFS encourage NBs, Liaisons organizations, SCs and TCs to:
  - 1) keep SGFS informed of user requirements they have collected;
  - 2) keep SGFS informed of taxonomy developments and how they accommodate users requirements;
  - 3) take steps to ensure that such taxonomies are harmonized;
05. SGFS resolve that a Profile should describe the correlation between the Profile definition and the user requirements;
06. SGFS request that NBs, Liaisons organizations and SCs involved in OSE and specific applications areas, provide SGFS with information on the required conformance testing methodology for Profiles, and in particular to comment on the applicability of ISO 9646 and IEEE 1003.3 (currently under consideration by SC22/WG15) in their areas of work;
07. NBs and Liaisons organizations review and comment the following documents in time for the next SGFS meeting:
  - 1) initial draft TR10000-1.3;
  - 2) issues list;
  - 3) proposals for OSE Taxonomy such as the initial draft contained in SGFS N337 and N405 Annex C;

The SGFS Subgroup thanks the EWOS staff for their efficient support during the meeting.

The SGFS Subgroup thanks EWOS for hosting the meeting and for its generous hospitality.

The SGFS Subgroup thanks Willem Wakker for volunteering and doing the most efficient work as a Secretary for this meeting.
