Title : Japanese comments on SGFS N396 (Issues on Registration)

Source : Japan

Status :

Note :

Title : Comments on N396

Source : Japan

Japanese National Body believes ISP is equivalent level of standard with IS and registration of VTE and other information objects should be allowed under the circumstances such as base standard permits registration of information object, and pdISP is well internationally harmonized and reviewed by the relevant organizations. In this case there is no big impact to the ballot, distribution, and quality of ISP. In other cases Japanese National Body believes SGFS should not extend the registration procedure too easy.
