Title : Liaison statement from JTC1/SGFS to ITU-T Study Group 7
Source: Authorized Subgroup meeting SGFS
Date : December 3, 1993
Status: Approved

SGFS has reviewed the liaison statement from ITU-T Study Group 7 (SGFS/N1033) and welcomes the input.

The actions and information contained in the contribution will be further reviewed in the context of the work in each of the corresponding areas as progressed in the workshops; SGFS will inform Study Group 7 on further progression.

SGFS was happy to notice the interest of ITU-T SG 7 in the Informal Quality Service through the "list of contact persons for informal review of PDISPs". This list has been included in the current revision of SGFS Standing Document 3 (SGFS N1053). In this context SGFS want to draw the attention of SG 7 to the following items:
- the list of names may be better termed "list of contact persons for the Informal Quality Service" (being the name of the service);
- SD3 is organized in a way which allows the reviewers to be identified, given (part of) the profile subclasses (a list of such subclasses is attached). To facilitate maintenance of SD3, SG 7 is asked to submit additional information on particular
f ields of expertise of reviewers.
