ISP MAINTENANCE

EWOS/EG FT will produce a new amended version of ISP 10607. The intention is to publish it in November 1993. This gives us the opportunity to:

- include the CULR profile,
- take into account the corrigenda and amendments to the FTAM base standard,
- take into account any changes to the FTAM references,
- align editorial aspects of the different parts,
- take into account reported defects in the ISPs.

We will send you the updated version of the ISP maintenance log when ready. You are invited to comment.
