The National Body of Japan approves ISO/IEC DTR 22250-1 with the following comments:

1. Changes for harmonizing with RELAX Namespace

- Add the attribute "namespace" to ref/hedgeRef.
- Introduce <hedgeExport> as a subordinate of <interface>. The only permissible attribute is "label".
- Add the attribute "role" to <export>. An <export> element may specify either this attribute or the attribute "label".
- Allow wildcards for elements/attributes for foreign namespaces.

2. Changes for harmonizing with the 2nd Proposed Recommendation, XML Schema Part 2

- Revise permissible datatypes and facets accordingly.
- Introduce user-defined datatypes based on XML Schema Part 2.
- Allow URI references containing non-ascii characters.
