ISO TC 184/SC 5  
ARCHITECTURE AND COMMUNICATIONS

15 June 1992

Mr. Peter J.J. Bessems  
Secretariat, JTC 1/SGFS  
Nederlands Normalisatie-instituut  
Kalfjeslaan 2  
Postbus 5059  
2600 GB Delft  
NETHERLANDS

Dear Mr. Bessems:

On behalf of ISO TC 184/SC 5 and its WG 2, I would like to relay to you both a statement and a request for participation regarding an effort to make the Manufacturing Message Specification (IS 9506) an "A" profile.

I would appreciate your forwarding this statement and request to your members for review and action.

This effort underscores the role that ISO/TC 184/SC 5 has in functional standards for industrial automation. SC 5 was recently assigned by TC 184 the responsibility to coordinate its profiles in the JTC 1 taxonomy. Accordingly, SC 5 has resolved to establish a physical liaison with JTC 1/SGFS and is working toward identifying an individual to serve in this capacity. I will contact you once that liaison has been found.

Thank you for your immediate attention to the MMS profile statement and request for participation.

Sincerely,

Greg Winchester  
SC 5 Secretary

## Participation in ISP Process

Dear Colleague,

with the attached statement from ISO/TC 184/SC 5 "Architecture and Communication" and ISO/TC 184/SC 5/WG 2 "Communication and Interconnection" these committees ask SG-FS for participation in the development of MMS as an "A" profile.

Please give me an indication how a cooperation can proceed.

I appreciate your response to

Meinolf Gröpper

Kind regards

  
Meinolf Gröpper

Encl.: Liaison Statement

Title: Liaison Statement to  
JTC 1/ SG-FS - Special Group on Functional Standards

Source: ISO/TC 184/SC 5 "Architecture & Communications"

Subject: Participation in ISP Process

ISO/TC 184 "Industrial Automation and Integration" met in Tokyo, Japan, March 24/25 1992 and as part of the discussions assigned ISO/TC 184/SC 5 "Architecture & Communications" the responsibility for coordinating ISP's with JTC 1 SG-FS.

ISO/TC 184/SC 5 has been for sometime attempting to record "Manufacturing Message Specification (MMS)" in the taxonomy as an "A" profile. The standard is published as a core set ISO/IEC 9505-1 and ISO/IEC 9505-2.

ISO/TC 184/SC 5 has agreed to cooperate using the JTC 1 procedures and supplying experts for review of profiles developed by the "S" Liaisons, especially the regional workshops.

If this is acceptable to SG-FS as outlined in the Berlin meeting, SC 5 would like some indication how best to proceed.
