UK POSITION

The UK endorses the EWOS position on the revision of WDs TR 10000 Parts 1.3 (SGFS N 817) and 3.2 (SGFS N ~~839~~⁸⁶²) and supports:

- a) that the WDs should be progressed together;
- b) the EWOS position on the technical direction of the work, in particular the overall aspects of OSE concepts and the nature of OSE profiles;
- c) further work to define OSE concepts, in particular "building blocks" and "scenarios". These concepts should be defined as identified in WD TR 10000-3.2;
- d) the position on the scope of OSE profiles and their relationship to OSI profiles.

The UK also points out that there are IEEE documents that will be useful for OSE terminology and these are:

- 1) P1000.0 Draft 15 - POSIX Profiles Guide
- 2) P1003.0 - Profiles Guide
- 3) P003.1 - Language Independent Specification (LIS) Draft
