Subject: Acknowledgment of Those who Contributed to Language-Independent Datatypes (ISO/IEC 11404) and Language-Independent Procedure Calling (ISO/IEC 13886)

1995 has been an important year for WG11: the Language-Independent Datatypes standard (LID, ISO/IEC 11404) and the Language-Independent procedure Calling standard (LIPC, ISO/IEC 13886) were finally completed. As these events mark the end of an important era for WG11, the start of 1996 seems to be an appropriate moment to thank all who have contributed to these documents: without their contributions the projects would never have reached completion.
