Business Plan and Convener’s Report
ISO/IEC JTC1/SC22/WG14 (The Programming Language C)

Document:
ISO/IEC JTC1/SC22/WG14 N1067

Date:
7/1/2004

PERIOD COVERED:
July 2002 - July 2003

SUBMITTED BY:
Convener, ISO/IEC JTC1/SC22/WG14
John Benito
P.O. Box 2998
Santa Cruz, CA 95063-2998
USA

Fax: +1 (831) 427-0621
Email: jb@benito.com

1. MANAGEMENT SUMMARY

1.1. JTC1/SC22/WG14 STATEMENT OF SCOPE
Development and maintenance of ISO/IEC Standards related to the programming language C.

1.2. PROJECT REPORT

1.2.1. COMPLETED PROJECTS
JTC1.22.20.01 – Programming Language C (Revision of ISO/IEC 9899:1990), this project was delivered by the publishing of ISO/IEC 9899:1999.

JTC1 NP 18037, Extensions for the programming language C to support embedded processors. This is a Technical Report type II.

JTC1 NP 19769, Specification for Additional Character Data Types to the Programming Language C. This is a Technical Report type II.

1.2.2. PROJECTS UNDERWAY
JTC1 NP 24731, Specification for Secure C Library Functions. This is a Technical Report type II.
JTC1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic. This is a Technical Report type II.

1.2.3. CANCELLED PROJECTS
None over this period.

1.2.4. COOPERATION and COMPETITION
Where appropriate, WG14 has established active liaisons with other SC22 working groups. There is no apparent direct competition with any other current SC22 working group.

2. PERIOD REVIEW

2.1. MARKET REQUIREMENTS
WG14 feels that it is responding to user community pressure and to implementers concerns by revising the ISO/IEC 9899:1995 standard on schedule. WG14 believes this new ISO/IEC 9899:1999 answers many concerns and keeps the International Standard for the C programming language current with today’s programming trends and market. The evolution of Object Oriented programming, numerical extensions that were proposed by J11.1, internationalization, advancements in character set standardization, cross-language standards and cross-language bindings all were considered in the newly revised standard. These issues were also taken into consideration with the projects JTC1 NP 18037 and JTC1 NP 19769, both are soon to published type II Technical Reports. WG14 is responding to the security issues of the C programming language with the new project JTC1 NP 24731. Many of these issues where considered during the technical discussions for the original ISO C Standard ISO/IEC 9899:1999. Please, see document ISO/IEC JCT 1/SC22 N2265 “Charter for the Revision of the C Standard” for more details.

2.2. ACHIEVEMENTS
WG14 has worked on Defect Reports, keeping the Defect Report Log current for the 9899:1999 Standard, submitting a Technical Corrigendum II for ballot, see SC22 N3744. Good progress has been made on TR 19769 “Specification for Additional Character Data Types to the Programming Language C” with the Committee submitting the final version for publication. WG14 has made very good progress on the TR 18037 “Extensions for the programming language C to support embedded processors”, submitting the final version for publication. WG14 has also submitted two new work item requests, one for specifying a secure C library and the other to specify the addition of decimal floating-point both have been approved. See SC22 N3704 and SC22 N3720.

2.3. RESOURCES
WG14 meets two times per year in co-located technical sessions with the US committee NCITS J11. Over the past year, WG14 has timed its technical sessions to coincide with WG21, allowing those technical experts that would like to attend both technical sessions the opportunity to do so. (The WG14 Convener would like to thank the WG21 Convener for the extended effort it takes to coordinate common meeting locations and liaison between the two working groups.) Twelve countries participate by attending these meetings or by being involved in the technical discussions that take place over the reflector. The countries are: Australia, Canada, Denmark, France, Germany, Ireland, Japan, Netherlands, Norway, Sweden, UK, and the USA.
WG14 has been monitoring the cross-language standards activities, and are using the ISO/IEC JTC 1/WG20 guidelines on extended characters. WG14 has also keeps appraised of the requirements of the LIA-1, 2 standards.

WG14 liaison appointments are:

<table>

3. **FOCUS NEXT WORK PERIOD**

WG14 will focus on the new work item JTC1 NP 24731, a type II technical report; see ISO/IEC SC22 N3704, and work item JTC1 NP 24732, see SC22 N3720. The Committee discussed several other possible new work items, there seems to be interest to start work on a Technical Report Type II for additional special math functions. The other items identified are:

1. Conformance
2. Sequence Points
3. Time

3.1. **DELIBERABLES**

None.

3.2. **STRATEGIES**

WG14 believes that routine handling will suffice to complete the progress desired.

3.3. **RISKS**

No problems are anticipated.

3.4. **OPPORTUNITIES**

None.

3.5. **WORK PROGRAM PRIORITIES**

WG14 will concentrate on the new work item NP 24731 and work item NP 24732, however WG14 will still respond to Defect Report logged for the current ISO/IEC 9899:1999 Standard.

4. **OTHER ITEMS**

4.1. **POSSIBLE ACTION REQUESTS AT FORTHCOMING PLENARY**

None

4.2. **WG14 SUPPORTS SC22 N2718**

WG14 supports the action requested in ISO/IEC JTC 1/SC22 N2718.

---

\(^1\) WG15 is no longer active, at the next WG14 meeting this liaison will be reviewed.

\(^2\) Dinkumware, Glassborow, Intel, Oracle, Plum Hall, Perennial, Sun Microsystems.
4.3. PROJECT EDITORS
The following individuals have been appointed project editors and backup project editors:

JTC1.22.20.01 Programming Language C (Revision of ISO/IEC 9899:1990)
Larry Jones (Project Editor), Douglas Walls (Backup Project Editor)

JTC1 NP 18037, Extensions for the programming language C to support embedded processors.
Willem Wakker (Project Editor), John Benito (Backup Project Editor)

JTC1 NP 19769, Specification for Additional Character Data Types to the Programming
Language C.
Nobuyoshi Mori (Project Editor), John Benito (Backup Project Editor)

JTC1 NP 24731, Specification for Secure C Library Functions
Randy Meyers (Project Editor), P. J. Plauger (Backup Project Editor)

JTCE NP 24732, Extensions for the programming language C to support decimal floating point
arithmetic
P. J. Plauger (Project Editor), John Benito (Backup Project Editor)

4.4. ELECTRONIC DOCUMENT DISTRIBUTION
WG14 has conducted much of its detailed technical discussion using email reflector provided by
the Danish UNIX Users Group and Keld Simonsen.

WG14 also has an ftp and Web site provided by courtesy of the Danish UNIX Users Group and
Keld Simonsen.

WG14 is now providing all the appropriate committee documents on the Committee Web site,
eliminating the need for paper mailings.

4.5. RECENT MEETINGS
05-09 Feb 1996 Irvine, CA USA ANSI
24-28 Jun 1996 Amsterdam, NL NEN
21-15 Oct 1996 Toronto, Canada SCC, IBM
23-27 Jun 1997 London, UK BSI, Plum Hall Europe
20-24 Oct 1997 Menlo Park, CA USA ANSI, Sun Microsystems
02-06 Feb 1998 Frisco, CO USA ANSI Keaton Consulting
23-27 Jun 1998 Copenhagen, Denmark Danish Standards
05-09 Oct 1998 Santa Cruz, CA USA ANSI, SGI/Cray
01-05 Feb 1999 Portland, OR USA ANSI, Intel Corp.
21-24 Jun 1999 London, UK BSI
18-23 Oct 1999 Kona, HI USA ANSI, Plum Hall
10-14 Apr 2000 Tokyo, Japan ITSCJ, NEC
16-20 Oct 2000 Toronto, Canada SCC, IBM
23-27 Apr 2001 Copenhagen, Denmark Danish Standards
16-20 Oct 2001 Redmond, WA USA ANSI, Microsoft
15-19 April 2002 Curacao, Netherlands Antilles; NNI, Netherlands
14-20 Oct 2002 Santa Cruz, CA USA ANSI, Dinkumware
31-04 Mar/Apr 2003 Oxford, UK BSI, ACCU
21-24 Oct 2003 Kona, HI USA ANSI, Plum Hall
29-02 Mar/Apr 2004 Sydney, Australia SA, Whitesmiths
### 4.6. FUTURE MEETINGS
