Business Plan and Convener’s Report
ISO/IEC JTC 1/SC 22/WG 14 (The Programming Language C)

Document:
ISO/IEC JTC 1/SC 22/WG 14 N1314

Date:
2008-06-11

PERIOD COVERED:

SUBMITTED BY:
Convener, ISO/IEC JTC 1/SC 22/WG 14
John Benito

1. MANAGEMENT SUMMARY

1.1. JTC 1/SC 22/WG 14 STATEMENT OF SCOPE
Development and maintenance of ISO/IEC Standards related to the programming language C.

1.2. PROJECT REPORT

1.2.1. COMPLETED PROJECTS
JTC 1.22.20.01 – Programming Language C (Revision of ISO/IEC 9899:1990), this project was delivered by the publishing of ISO/IEC 9899:1999.

JTC 1 NP 18037, Extensions for the programming language C to support embedded processors. This is a Technical Report type II.

JTC 1 NP 19769, Specification for Additional Character Data Types to the Programming Language C. This is a Technical Report type II.

JTC 1 NP 24731, Extensions to the C Library, — Part I: Bounds-checking interfaces. This is a Technical Report type II.
1.2.2. PROJECTS UNDERWAY

JTC 1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic. This is a Technical Report type II.

JTC 1 NP 24747, Extensions for the C Standard Library to Support Mathematical Special Functions. This is an International standard.

JTC 1 NP 24731, Extensions to the C Library – Part 2: Dynamic Allocation Functions. This is a Technical Report type II.

1.2.3. CANCELLED PROJECTS

None over this period.

1.2.4. COOPERATION and COMPETITION

Where appropriate, WG 14 has established active liaisons with other SC 22 working groups. There is no apparent direct competition with any other current SC 22 working group.

2. PERIOD REVIEW

2.1. MARKET REQUIREMENTS

WG 14 feels that it responded to user community pressure and to implementers concerns when the ISO/IEC 9899:1995 standard was updated on schedule. WG 14 believes that the ISO/IEC 9899:1999 standard answered many concerns and kept the International Standard for the C programming language current; however with today’s programming trends and market WG 14 believes it is time to once again revise the C standard. See WG 14 N1250.

WG14 believes the newly published TR 18037, TR 19769, TR 24731 Part I and the ongoing work on TR 24731 Part II, the work on TR 24732, and the work on IS 24747 address important issues that benefit the entire C community.

2.2. ACHIEVEMENTS

- WG 14 has worked on Defect Reports; keeping the Defect Report Log current for the 9899:1999 Standard.
- WG 14 has worked on all the Defect Reports filed for TR 18037; the Defect Report Log for TR 18037 is current.
- An updated version of TR 18037 is very close to publication, see SC 22 N4279
- The TR 24731 Part I has been published.
- The text for PDTR 24731 Part II passed the registration ballot, see SC 22 N4176
- The TR 24732 passed the registration ballot, see SC 22 N4141 Project has been put on hold; WG 14 does not want to publish Decimal floating-point before IEEE gets their revised standard published.
- The text for the FCD of 24747 has been forwarded to SC 22 for ballot, see SC 22 N4318.

2.3. RESOURCES

WG 14 meets two times per year in co-located technical sessions with the US Task Group INCITS PL22.11. Over the past several years, WG 14 has timed its technical sessions to coincide with WG 21, allowing those technical experts that would like to attend both technical sessions the opportunity to do so without extra travel. The WG 14 Convener would like to thank the WG 21 Convener for the extended effort it takes to coordinate common meeting locations and liaison
between the two working groups. Thirteen countries participate by attending these meetings or by being involved in the technical discussions that take place over the reflector. The countries are: Australia, Canada, Denmark, France, Germany, Ireland, Japan, Netherlands, Norway, Russia, Sweden, UK, and the USA.

WG14 has been monitoring the cross-language standards activities, and are using the ISO/IEC JTC 1/WG 20 guidelines on extended characters. WG 14 has also keeps appraised of the requirements of the LIA-1, 2 standards.

WG14 liaison appointments are:

3. FOCUS NEXT WORK PERIOD

WG14 will focus on:

- Work item JTC 1 NP 24732, a type II technical report; see SC 22 N3720, N3740 and N4060. The IEEE finally published the revised 754 Standard in July of this year. WG 14 will review the IEEE 754R and make any appropriate changes to keep the text of TR 24732 consistent with IEEE 754R, then forward the TR for ballot and publication.
- Work item JTC 1 NP 24747, an international standard, see SC 22 N3814, and N4201.
- Work item JTC 1 NP 24731 Part II, a type II technical report, see SC 22 N4176.

The Committee has discussed several other possible new work items, but believes it is time to start working on a revision of the standard. See WG 14 N1250.

3.1. DELIVERABLES

None.

3.2. STRATEGIES

WG14 believes that routine handling will suffice to complete the progress desired.

3.3. RISKS

No problems are anticipated.

3.4. OPPORTUNITIES

None.

3.5. WORK PROGRAM PRIORITIES

WG 14 will concentrate on the work item NP 24731 and will work on the projects NP 24732 and NP 24747. WG 14 will respond to any Defect Reports logged for the current ISO/IEC 9899:1999 Standard and the two published Technical Reports TR 18037 and TR 19769. WG 14 will also start the process of revising the C standard.

---

1 Dinkumware, Intel, Microsoft, Oracle, Plum Hall, Perennial, and Sun Microsystems.
4. **OTHER ITEMS**

4.1. **POSSIBLE ACTION REQUESTS AT FORTHCOMING PLENARY**
None.

4.2. **PROJECT EDITORS**
The following individuals have been appointed project editors and backup project editors:

JTC 1.22.20.01 Programming Language C (Revision of ISO/IEC 9899:1990)
- Larry Jones (Project Editor), Nick Stoughton (Backup Project Editor), and David Keaton (Backup Project Editor).

JTC 1 NP 18037 Extensions for the programming language C to support embedded processors.
- Willem Wakker (Project Editor), John Benito (Backup Project Editor)

JTC 1 NP 19769 Specification for Additional Character Data Types to the Programming Language C.
- Nobuyoshi Mori (Project Editor), John Benito (Backup Project Editor)

JTC 1 NP 24731 Extensions to the C Library, Part I: Bounds-checking interfaces
- Randy Meyers (Project Editor), P. J. Plauger (Backup Project Editor)

JTC 1 NP 24732 Extensions for the programming language C to support decimal floating point arithmetic
- Edison Kwok (Project Editor), P. J. Plauger (Backup Project Editor)

JTC 1 NP 24747 Extensions for the Standard Library of the Programming Language C to Support Mathematical Special Functions
- P. J. Plauger (Project Editor), John Benito (Backup Project Editor)

4.3. **ELECTRONIC DOCUMENT DISTRIBUTION**
WG 14 has conducted some of its detailed technical discussion using email reflector provided by the Danish UNIX Users Group, Copenhagen University College of Engineering and Keld Simonsen.

WG 14 also has an ftp and Web site provided by courtesy of the Copenhagen University College of Engineering, Danish UNIX Users Group and Keld Simonsen.

WG 14 uses a secure wiki setup and maintained by Dinkumware, Ltd. This wiki is used for quick exchange of documents during and between meetings.

WG 14 is now providing all the appropriate committee documents on the Committee Web site, eliminating the need for paper mailings.
