Business Plan and Convener’s Report
ISO/IEC JTC 1/SC 22/WG 14 (The Programming Language C)

Document:
ISO/IEC JTC 1/SC 22/WG 14 N 2070

Date:
2016-08-18

PERIOD COVERED:
July 2015 – August 2016

SUBMITTED BY:
Convener

1. MANAGEMENT SUMMARY

1.1. JTC 1/SC 22/WG 14 STATEMENT OF SCOPE
Development and maintenance of ISO/IEC Standards related to the programming language C.

1.2. PROJECT REPORT

1.2.1. COMPLETED PROJECTS
JTC 1.22.20.01 – Programming Language C (Revision of ISO/IEC 9899:1999), this project was delivered by the publishing of ISO/IEC 9899:2011.

JTC 1 NP 18037, Extensions for the programming language C to support embedded processors. This is a Technical Report type II.

JTC 1 NP 19769, Specification for Additional Character Data Types to the Programming Language C. This is a Technical Report type II.

JTC 1 NP 24731, Extensions to the C Library, — Part I: Bounds-checking interfaces. This is a Technical Report type II.

JTC 1 NP 24731, Extensions to the C Library — Part 2: Dynamic Allocation Functions. This is a Technical Report type II.

JTC 1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic. This is a Technical Report type II.
JTC 1 NP 24747, Extensions for the C Standard Library to Support Mathematical Special Functions. This is an International Standard.

JTC 1 NP 17961, C Secure Coding Rules. This is a Technical Specification.

JTC 1 NP 18661-1, Floating-point extensions for C – Part 1: Binary floating-point arithmetic. This is a Technical Specification.

JTC 1 NP 18661-2, Floating-point extensions for C – Part 2: Decimal floating-point arithmetic. This is a Technical Specification.

JTC 1 NP 18661-3, Floating-point extensions for C – Part 3: Interchange and extended types. This is a Technical Specification. (Published date 2015-10-01)

JTC 1 NP 18661-4, Floating-point extensions for C – Part 4: Supplementary functions. This is a Technical Specification. (Published date 2015-10-06)

1.2.2. PROJECTS UNDERWAY
JTC 1 NP 18661-5, Floating-point extensions for C – Part 5: Supplementary attributes. This is a Technical Specification that has passed FDIS and is currently being published.

JTC 1 TS 17961:2013/COR 1, C Secure Coding Rules. This is a Technical Corrigendum for a Technical Specification. It has passed its ballot and is currently being published.

A new multipart Technical Specification is being proposed:

Programming language C — Extensions for parallel programming — Part 1: Thread-based parallelism

Programming language C — Extensions for parallel programming — Part 2: Vector-based parallelism

1.2.3. CANCELLED PROJECTS
None over this period.

1.2.4. COOPERATION and COMPETITION
Where appropriate, WG 14 has established active liaisons with other SC 22 working groups. A category C liaison has been established with the MISRA C working group. There is no apparent direct competition with any other current SC 22 working group.
2. PERIOD REVIEW

2.1. MARKET REQUIREMENTS

The publication and maintenance of TS 17961 addresses important security issues that affect the entire C community. The document is in active use in the industry, and resulting valuable feedback has led to a Technical Corrigendum.

WG14 is currently publishing TS 18661 part 5. This is the final part of a C binding to the new IEEE Floating-point, see SC 22 N 5112.

WG 14 is currently proposing a new multipart Technical Specification to address extensions to the C programming language to support parallel programming.

WG 14 is currently working on how best to deal with the mandated ISO (Live Link/Open Text) e-committee package.

2.2. ACHIEVEMENTS

- WG 14 is currently working on 23 open defect reports logged against 9899:2011 and 7 open defect reports on TS 18661 parts 1-4.
- WG 14 published the Technical Specification 18661 part 3.
- WG 14 is in the process of publishing TS 18661 part 5.
- WG 14 has a study group to study approaches to adding parallel programming to the language, and is proposing a new multipart Technical Specification in this area.
- WG 14 has incorporated ISO e-committee into its workflow, and is committed to making this system work.

2.3. RESOURCES

WG 14 meets two times per year in co-located technical sessions with the US Task Group INCITS PL22.11. Over the past several years, WG 14 has timed at least one of its yearly technical sessions to coincide with WG 21, allowing those technical experts that would like to attend both technical sessions the opportunity to do so without undue travel. The WG 14 Convener would like to thank the WG 21 Convener for the extended effort it takes to coordinate meetings adjacent in time, and often common meeting locations, as well as liaison between the two working groups.

This year and next year, WG 14 and WG 23 have timed their April meetings to coincide with each other, which facilitates security-related discussions across the
committees. The WG 14 Convener would like to thank the WG 23 Convener for his extended coordination effort as well.

Over the last several years WG 14 has made Web conferencing capabilities available for those that are finding it difficult to travel. WG 14 would like to thank ISO for the Web conferencing support.

In the past years, fifteen countries have participated by attending these meetings or by being involved in the technical discussions that take place over the e-mail reflector. The countries are: Australia, Canada, Denmark, France, Germany, Italy, Ireland, Japan, the Netherlands, Norway, Russia, Spain, Sweden, the UK, and the US. However, with the new system mandated by ISO, only ten of the fifteen will be able to participate: Canada, Denmark, Germany, Italy, Japan, Korea, the Netherlands, Russia, the UK and the US.

WG14 liaison appointments are:

<table>
<thead>
<tr>
<th>Group</th>
<th>Name/Type</th>
<th>Person(s) assigned</th>
</tr>
</thead>
<tbody>
<tr>
<td>WG 21</td>
<td>C++</td>
<td>Group liaison assigned</td>

<td>Vulnerabilities</td>
<td>Clive Pygott</td>
</tr>
<tr>
<td>MISRA-C</td>
<td>Category-C Liaison</td>
<td>Andrew Banks</td>
</tr>
</tbody>
</table>

3. **FOCUS NEXT WORK PERIOD**

WG14 will focus on:

- Finalizing publication of TS 18661 part 5.
- Studying parallel programming, and developing a multipart Technical Specification on the subject.
- Discussing potential future improvements to the security of C, notably in Annex K, Bounds-checking interfaces.

The Committee has discussed several other possible new work items for the future.

3.1. **DELIVERABLES**

Publication of TS 18661-5 and TS 17961:2013/COR 1 as described in1.2.2.

3.2. **STRATEGIES**

WG14 believes that routine handling will suffice to complete the progress desired.

3.3. **RISKS**

A decrease in participation due to being forced to comply with a mandate from ISO, see JTC 1/N 12032.

---

1 Intel, Oracle, Plum Hall, and Perennial.
3.4. **OPPORTUNITIES**

None.

3.5. **WORK PROGRAM PRIORITIES**

4. **OTHER ITEMS**

4.1. **POSSIBLE ACTION REQUESTS AT FORTHCOMING PLENARY**

None.

4.2. **PROJECT EDITORS**

The following individuals have been appointed project editors and backup project editors:

- **JTC 1.22.20.01, Programming Language C (Revision of ISO/IEC 9899:2011)**
  - Larry Jones (Project Editor), Jens Gustedt (Backup Project Editor).

- **JTC 1 NP 18037, Extensions for the programming language C to support embedded processors**
  - Willem Wakker (Project Editor)

- **JTC 1 NP 19769, Specification for Additional Character Data Types to the Programming Language C**
  - None. Incorporated into the C standard and not intended to be maintained.

- **JTC 1 NP 24731, Extensions to the C Library – Part I: Bounds-checking interfaces**
  - None. Incorporated into the C standard and not intended to be maintained.

- **JTC 1 NP 24731, Extensions to the C Library – Part 2: Dynamic Allocation Functions**
  - David Keaton (Project Editor)

- **JTC 1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic**
  - Edison Kwok (Project Editor)

- **JTC 1 NP 24747, Extensions for the Standard Library of the Programming Language C to Support Mathematical Special Functions**
  - David Keaton (Project Editor)

---

2 Currently not listed in the ISO global directory.
4.3. ELECTRONIC DOCUMENT DISTRIBUTION

WG 14 has conducted some of its detailed technical discussion using an e-mail reflector provided by the Danish UNIX Users Group, Copenhagen University College of Engineering and Keld Simonsen.

WG 14 also has an ftp and Web site provided by courtesy of the Copenhagen University College of Engineering, Danish UNIX Users Group and Keld Simonsen. WG 14 has also placed its documents on the ISO mandated site, and updates the site with each new document.

WG 14 is providing all the appropriate committee documents on the Committee Web site, eliminating the need for paper mailings.

WG 14 also now provides Web conference capabilities allowing technical experts that are not able to travel to participate.

WG 14 has previously reported the following issues with the e-committee system. The Working Group keeps the system up to date with all documents and is committed to switching to it once these issues are resolved.

- The URLs of documents in e-committee are neither static nor predictable. The defect report log, agendas, and document log all need to point to easily predictable and understandable URLs to keep errors to a minimum. They also need to point to unchanging URLs to prevent bit rot in the committee’s records.
- The e-committee documents are not searchable by search engines. The C community has benefited greatly from WG 14 documents being available as search results.
- The document names and descriptions are truncated. On the external WG 14 site, this problem is avoided by having a document log with the description of each document and the name of its submitter. The file names are the N numbers of the documents, making the URLs predictable and simple.
- Corrupted files are difficult to replace, requiring intervention from ISO.

4.4. RECENT MEETINGS

27-31 Mar 2006 Berlin, Germany DIN, SAP
23-27 Oct 2006 Portland, OR, USA ANSI, Intel Corp
23-26 Apr 2007 London, UK BSI
08-11 Oct 2007 Kona, HI, USA ANSI, Plum Hall
14-18 Apr 2008 Delft, Netherlands NIN, ACE
08-12 Sept 2008 Santa Clara, CA, USA ANSI, Cisco Systems
30-04 Mar/Apr 2009 Toronto, Canada SCC, IBM
26-30 Oct 2009 Santa Cruz, CA, USA ANSI, Plantronics
19-23 Apr 2010 Florence, Italy Università Firenze
01-05 Nov 2010 Batavia, IL, USA ANSI, Fermi Lab.
14-18 Mar 2011 London, UK BSI
24-28 Oct 2011 Washington, DC, USA ANSI, Blue Pilot
13-17 Feb 2012 Kona, HI, USA ANSI, Bloomberg LP
11-13 Jun 2012 Web Conference ISO, Blue Pilot
22-26 Oct 2012 Portland, OR, USA ANSI, Intel
23-26 Apr 2013 Delft, NL NIN, ACE
30-03 Sep/Oct 2013 Chicago, IL, USA ANSI, DRW Trading Group
07-11 April 2014 Parma, IT UNINFO, Univ. of Parma
27-30 Oct 2014 St. Louis, MO, USA ANSI, Seymour
13-17 April 2015 Lysaker, NO SN, Cisco
26-30 Oct 2015 Kona, HI, USA ANSI, Plum Hall
11-14 Apr 2016 London, UK BSI

4.5. FUTURE MEETINGS

17-21 Oct 2016 Pittsburgh, PA, USA ANSI, CERT
03-06 Apr 2017 Markham, ON, Canada SCC, IBM
