Canadian Contribution to JTC 1/SC 22  
on the future of WG 23

WG 23 submitted a work plan for the third edition of TR 24772 to the SC 22 2014 plenary that adds one or more additional language-specific annexes, to bring existing annexes up to date with the core document, and adds new vulnerabilities as they are identified. In addition, WG 23 has attracted new membership and interest with the participation of the NB of Spain and liaison requests from SC 27 WG 3 and WG 4. WG 23 has a plan in place for the maintenance of all of its language-specific annexes.

Canada supports the work of WG 23. Canada moves that SC 22, at its 2014 plenary, provide a strong statement of support to WG 23 and its work plan.
