Title: WG14 comments on ISO/IEC CD 14651

Source: ISO/IEC JTC1/SC22/WG14

Status: liaison statement

Date: 1997-02-14

SC22/WG14 has reviewed ISO/IEC CD 14651, and envisions no technical problems with Standard C binding to Std 14651. However, we note that the intent of WG14 is for LC-COLLATE to encode all requisite collating information for using strxfrm and strcoll to perform collation, even at a high level of conformance to 14651.
