

to the attention of  
ANSI X3J11

Concerning the ANSI/ISO C standard

ISO SC22/WG14 has considered the work of ANSI X3J11 for an ISO standard. We ~~have submitted~~ <sup>and have</sup> had the draft dated 15 May 1987 ~~out~~ <sup>for balloting</sup> as ISO DP 9899.

The ballot resulted in several no votes from the ISO SC22 member bodies, and WG14 thus requires X3J11 to resolve all these negative votes, including a solution for an alternative to the trigraph representation.

After that WG14 ~~is~~ <sup>will be</sup> able to forward the coming ANSI draft for registration as an ISO DIS.

WG14 would then like to proceed as explained in the accompanying letter to Mr. Coté of ISO.

WG14 further requires that no other substantial ~~additions~~ <sup>changes</sup> be made to the May 13 1988 ANSI C draft.
