

P.J. Plauger
ISO WG14 Convenor
398 Main Street
Concord, MA 01742, USA

Copenhagen, 1989-02-03

Dear Bill,

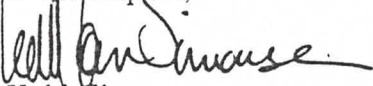

As requested in your letter of 6th December 1988, the working group on C of the Danish Standards Association would like to state the following:

Firstly, we request a second registration of the DP, as the Danish "no" vote has not yet been resolved by the current ANSI draft. Solution of the Danish "no" vote would require incorporation of the ISO WG14 recommendations, including a legible solution to the Non-ASCII ISO 646 7-bit representation.

If the above mentioned recommendations are implemented in the document, we would prefer registration of this revised document as a DIS, as this would speed up the arrival of the ISO standard.

With regards to your concerns about differing ISO and ANSI standards, we expect that ANSI will follow the guidelines in ISO/IEC JTC1/SC22 N555 "Synchronization of JTC1/ANSI activities". This implies that ANSI would delay ratification of the draft until the document has successfully passed the ISO DP ballot, thus ensuring conforming ISO and ANSI standards.

With respect,

Keld Simonsen

Chairman of DS u22 A13 Working Group on C
