P J Plauser
ISO Convenor WG14

8 February 1989

Dear Dr Plauser,

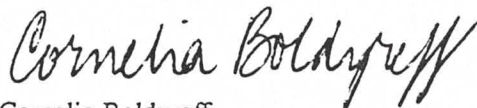

Regards the rebalancing of the draft proposed ISO C Standard

The UK C Panel met yesterday and discussed your letter of the 6th December 1988. Our position is as follows:

We are in favour of a rebalancing of the current draft recently approved by X3J11 as an ISO DP. As it stands, the draft still requires a number of editorial changes; and we do not wish to preclude the possibility of rectifying substantive errors or omissions which may be found in a further review of the document.

We do not wish to hold up progress of this standard at ISO level; and we feel it is important for there to be a single standard, that is why we have suggested that ANSI defer registration of the X3J11 draft until these outstanding issues have been resolved.

Yours sincerely,

Cornelia Boldyreff
Convenor, BSI IST/5/14 - C Panel
