

Title: Liaison statement to the Regional Workshops  
Source: Authorized Subgroup meeting JTC1/SGFS  
Date: December 3, 1993  
Status: Approved

The SGFS wants to draw the attention of the Regional Workshops to SGFS N1033, a liaison statement from ITU-T Study Group 7 to SGFS.

In the light of the various items brought forward by SG 7 in the contribution SGFS asks the workshops to review and comment the contributions, specifically with respect to the following items:

- usage of the terms 'permanent' versus 'semi-permanent' and the provisions currently made in TR10000 in this respect (these issues are of interest for the Lower Layer subgroups in the workshops);
- comments on the draft Pedi (X.435) PICS proforma (of interest for the MHS subgroups);
- the concept of profiles for 'interdomain' versus 'intercomponent' interoperability in the area of MOTIS MHS.
