to Mr. Mike Smith, ITTF

According to resolution N° 8 adopted in the plenary Meeting in Rennes, the CD 10918 is now approved for balloting as a DIS.

This has been developed within SC2 under the project 1.02.17.03 and, although future activities related to this program are transferred to SC29 and in order not to introduce further delay in the publication of this very important standard, the processing will continue to be handled by SC2 in the interim period.

Mr. Toughton is going today to Geneva and he is mandated by SC2 plenary to transfer this heavy document directly to you.

You will find enclosed a copy of relevant resolutions.

Yours sincerely,

J.M. BORDE
