## BUSINESS PLAN FOR JTC 1/SC 2

prepared 2002.09.10

PERIOD COVERED: October 2001 – September 2002

SUBMITTED BY: Kohji SHIBANO, Chair of JTC 1/SC 2

### ***1.0 MANAGEMENT SUMMARY:***

#### ***1.1 JTC 1/SC 2 STATEMENT OF SCOPE***

**Title:** Coded Character Sets

**Scope:** Standardization of graphic character sets and their characteristics, associated control functions, their coded representation for information interchange and code extension techniques. Excluded: audio and picture coding.

#### ***1.2 PROJECT REPORT***

**Total Number of Projects:** 50 including all subprojects

**Total Number of P members:** 35 P Members

New projects: None.

New subproject: 2

New revision work: None

Withdrawn project: None

#### ***1.3 COOPERATION AND COMPETITION***

SC 2 is playing the key role in the area of coded character set standardization.

SC 2 has been very successful in cooperation with TC 46, SC 22, SC 31, SC 32, SC 35, and SC 36.

SC 2 has also been successful in cooperation with external standard organizations, such as ITU-T, CEN/TC 304, and with industry consortia, such as Unicode Inc., ISOC, W3C and GSE (Guide Share Europe).

For SC 2/WG 2/IRG (Ideographic Rapporteur Group) work, TCA (Taiwan) and HKITF (Hong Kong) provided important contributions. For Mongolian script extension of

ISO/IEC 10646-1, UNU (United Nations University) provided an important contribution.

## ***2.0 PERIOD REVIEW***

### ***2.1 MARKET REQUIREMENTS***

As stated in the previous business plan, requirements for the development of Coded Character Sets are still strong.

Rapid development utilizing JTC 1 procedures are mandatory for SC 2 work.

Widespread use of the Internet technologies, such as WWW, even an ordinary person now is faced with and has to use ISO standard such as 8859 series of standards and 10646.

Therefore, easy access to SC 2 standards is still crucial to avoid confusions between users and implementers.

### ***2.2 ACHIEVEMENTS***

Published projects: 4

- ISO/IEC 10646-2: 2001, Universal Multiple-Octet Coded Character set (UCS) -- Part 2: Supplementary Planes (2001-11-01)
- Amendment 1 to ISO/IEC 10646-1: 2000, Mathematical symbols and other characters (2002-07-15)
- ISO/IEC 6937, Code graphic character set for text communication (2001-12-15)
- ISO/IEC 8859-11, 8-bit single-byte coded graphic character sets -- Part 11: Latin/Thai character set (2001-12-15)

Projects progressed to FDIS/FDAM:

- FDIS 2375, Procedure for registration of escape sequences

Projects progressed to FCD/FPDAM: 2

- Amendment 2 to ISO/IEC 10646-1: 2000, Limbu, Tai Le, Yijing and other characters
- Amendment 1 to ISO/IEC 10646-2: 2001, Aegean, Ugaritic, and other characters

### ***2.3 RESOURCES***

SC 2 should be considered as one of the largest SCs in JTC 1 in terms of membership. The number of current P-member National Bodies is 35 and O-member National Bodies is 11. All WGs and all developing projects have assigned officials. In this sense, SC 2 has sufficient resources.

### ***3.0 FOCUS NEXT WORK PERIOD***

#### ***3.1 DELIVERABLES:***

The following projects are expected to be published during the next reporting period.

Deliverables during the next period.

- ISO/IEC 2375, Procedure for registration of escape sequences

#### ***3.2 STRATEGIES:***

SC 2 should focus on the following four areas:

- (1) Provide easy access to SC 2 standards,
- (2) Support for new character coding requirements from developing countries,
- (3) Enhance visibility of SC 2 activities.
- (4) Clarification of character coding schemes.

##### ***3.2.1 RISKS***

SC 2 fully supports the goals of CLAUI TD. Especially, SC 2 is still considering that ensuring support of Cultural and Linguistic Adaptability in all JTC 1 standards is mandatory for future JTC 1 success as true international standards.

Current TD activities are not well coordinated between SC 2, SC 22/WG20 and SC 35. This may cause undesirable affect for the goal of the CLAUI TD.

##### ***3.2.2 OPPORTUNITIES***

SC 2 standards are and have been really effective for information interchange. However, as for internal processing codes, implementers' private coded character sets have been widely used.

Growing interests and requirements for real global information processing, there is an opportunities for SC 2 standards not only for information interchange but also for information processing including internationalized software portability.

### ***3.3 WORK PROGRAM PRIORITIES***

Enhancement of ISO/IEC 10646-1 is still the highest priority.

Amendment of ISO/IEC 10646-1 and 10646-2 will be important.
