1. MANAGEMENT SUMMARY

1.1. JTC 1/SC 22/WG 14 STATEMENT OF SCOPE

Development and maintenance of ISO/IEC Standards related to the programming language C.

1.2. PROJECT REPORT

1.2.1. COMPLETED PROJECTS

JTC 1.22.20.01 – Programming Language C (Revision of ISO/IEC 9899:1990), this project was delivered by the publishing of ISO/IEC 9899:1999.

JTC 1 NP 18037, Extensions for the programming language C to support embedded processors. This is a Technical Report type II.

JTC 1 NP 19769, Specification for Additional Character Data Types to the Programming Language C. This is a Technical Report type II.

JTC 1 NP 24731, Extensions to the C Library, — Part I: Bounds-checking interfaces. This is a Technical Report type II.

JTC 1 NP 24731, Extensions to the C Library — Part 2: Dynamic Allocation Functions. This is a Technical Report type II.

JTC 1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic. This is a Technical Report type II.

JTC 1 NP 24747, Extensions for the C Standard Library to Support Mathematical Special Functions. This is an International standard.

1.2.2. PROJECTS UNDERWAY

Currently all projects are complete and published or in the process of being published.

1.2.3. CANCELLED PROJECTS

None over this period.

1.2.4. COOPERATION and COMPETITION

Where appropriate, WG 14 has established active liaisons with other SC 22 working groups. A category C liaison has been established with the MISRA C working group. There is no apparent direct competition with any other current SC 22 working group.

2. PERIOD REVIEW

2.1. MARKET REQUIREMENTS

WG 14 feels that it responded to the C user community concerns and to the C implementers issues when the ISO/IEC 9899:1995 standard was updated on schedule, in 1999. WG 14 believes that the ISO/IEC 9899:1999 standard answered many concerns and kept the International Standard for the C programming language current; however with today's programming trends and market WG 14 believes it is time to once again revise the C standard. See WG 14 [N 1250](#).

WG14 believes the newly published TR 18037, TR 19769, TR 24731 Part I, TR 24731 Part II, TR 24732, and IS 24747, address important issues that benefit the entire C community.

WG14 is also studying whether Technical Specifications in the area of Secure Coding and a C binding to the new IEEE Floating-point standard are appropriate.

2.2. ACHIEVEMENTS

- WG 14 has worked on Defect Reports; keeping the Defect Report Log current for the 9899:1999 Standard. There are no *open* defect reports in the WG 14 defect report log.
- A successful CD ballot for 9899, see SC 22 N4578. WG 14 generated a disposition of comments document at the March meeting, see WG 14 [N 1555](#). 9899 is currently in DIS ballot with a close of voting date of 2011-10-06.
- WG14 has worked on all the Defect Reports filed for TR 18037; the Defect Report Log for TR 18037 is current.
- An updated version of TR 18037 has been published; see SC 22 N4279.
- The TR 24731 Part I has been published.
- The TR 24731 Part II has been published.
- The TR 24732 has been published.
- The IS 24747 has been published.

2.3. RESOURCES

WG 14 meets two times per year in co-located technical sessions with the [US Task Group INCITS PL22.11](#). Over the past several years, WG 14 has timed at least one of its yearly technical sessions to coincide with WG 21 and WG 23, allowing those technical experts that would like to attend both technical sessions the opportunity to do so without extra travel. The WG 14 Convener would like to thank the WG 21 Convener for the extended effort it takes to coordinate common meeting locations and liaison between the two working groups.

Fourteen countries participate by attending these meetings or by being involved in the technical discussions that take place over the reflector. The countries are: Australia, Canada, Denmark, France, Germany, Italy, Ireland, Japan, Netherlands, Norway, Russia, Sweden, UK, and the USA.

WG14 has been monitoring the cross-language standards activities, and are using the ISO/IEC JTC 1/WG 20 guidelines on extended characters. WG 14 has also keeps apprised of the requirements of the LIA-1, 2 standards.

WG14 liaison appointments are:

Group	Name/Type	Person(s) assigned
WG 11	Language Independent Datatypes	Willem Wakker
WG 21	C++	Group liaison assigned ¹
FSG	Free Standard Group	Nick Stoughton
WG 23	Vulnerabilities	Tom Plum
MISRA-C	Category-C Liaison	Steve Montgomery

3. FOCUS NEXT WORK PERIOD

WG14 will focus on:

- The revision of the Standard, which is currently in DIS ballot.

The Committee has discussed several other possible new work items, and is currently studying the possibilities for a Technical Specification on Secure Coding and a Technical Specification on a C binding to the new IEEE Floating-point standard.

3.1. DELIVERABLES

None.

3.2. STRATEGIES

WG14 believes that routine handling will suffice to complete the progress desired.

3.3. RISKS

No problems are anticipated.

3.4. OPPORTUNITIES

None.

3.5. WORK PROGRAM PRIORITIES

WG 14 will concentrate on the final steps in revising the C standard. WG 14 will respond to any Defect Reports logged for the current ISO/IEC 9899:1999 Standard and the four published Technical Reports TR 18037, TR 19769, TR 24731-1, TR 24731-2 and IS 24747.

4. OTHER ITEMS

4.1. POSSIBLE ACTION REQUESTS AT FORTHCOMING PLENARY

None.

4.2. PROJECT EDITORS

The following individuals have been appointed project editors and backup project editors:

JTC 1.22.20.01, Programming Language C (Revision of ISO/IEC 9899:1990)
Larry Jones (Project Editor), David Keaton (Backup Project Editor).

JTC 1 NP 18037, Extensions for the programming language C to support embedded processors.
Willem Wakker (Project Editor), John Benito (Backup Project Editor)

JTC 1 NP 19769, Specification for Additional Character Data Types to the Programming Language C.
Nobuyoshi Mori (Project Editor), John Benito (Backup Project Editor)

JTC 1 NP 24731, Extensions to the C Library – Part I: Bounds-checking interfaces
John Benito (Project Editor), P. J. Plauger (Backup Project Editor)

JTC 1 NP 24731, Extensions to the C Library – Part 2: Dynamic Allocation Functions.
John Benito (Project Editor)

JTC 1 NP 24732, Extensions for the programming language C to support decimal floating point arithmetic
Edison Kwok (Project Editor), P. J. Plauger (Backup Project Editor)

JTC 1 NP 24747, Extensions for the Standard Library of the Programming Language C to Support Mathematical Special Functions
John Benito (Project Editor), P. J. Plauger (Backup Project Editor)

4.3. ELECTRONIC DOCUMENT DISTRIBUTION

WG 14 has conducted some of its detailed technical discussion using email reflector provided by the Danish UNIX Users Group, Copenhagen University College of Engineering and Keld Simonsen.

WG 14 also has an ftp and [Web site](#) provided by courtesy of the Copenhagen University College of Engineering, Danish UNIX Users Group and Keld Simonsen.

WG 14 uses a secure wiki setup and maintained by Dinkumware, Ltd. This wiki is used for quick exchange of documents during and between meetings eliminating the need for paper during the meeting.

WG 14 is now providing all the appropriate committee documents on the Committee Web site, eliminating the need for paper mailings.

WG 14 also provides teleconference capabilities whenever possible allowing technical experts that are not able to travel to participate.
