   function, constructor and 12-2  
   function definition 9-5  
   function, destructor and 12-7  
   function example 9-6, 11-5  
   function, friend 11-5  
   function in local class 9-6  
   function, inline 9-5  
   function, local class 9-13  
   function, nested class 9-12  
   function, overload resolution and 13-5  
   function, static 9-8/9  
   function template 14-33  
   function, union 9-10  
   function, virtual 17-18, 20  
   function, volatile 9-7  
   initialization 12-12  
   initialization, const 12-13  
   initialization, order of 12-13  
   initialization, reference 12-13  
   initialization, static 9-9  
   initializer 8-14  
   initializer, scope of 12-14  
   local class restriction, static 9-10  
   name access 11-1  
   name access example 11-4  
   name lookup 10-4  
   name, overloaded 9-4  
   object initialization 12-12  
   of class type restriction 12-13  
   pointer to —see pointer to member  
   pointer value, null 4-4  
   static 9-8  
   static class 3-20  
   storage duration, class 3-21  
   template and static 14-35  
   type of static 5-12, 9-9
