

Title: Liaison to RWS-CC

Source: SGFS Authorized Subgroup Meeting, Amsterdam
29 November - 3 December 1993

Status: Request for further information on SGFSN1048, Resolution 8 on
"Compendium of ISPs"

The SGFS Authorized Subgroup meeting in Amsterdam reviewed the resolutions of the 10th RWS-CC meeting (SGFSN1048). In particular, SGFS noted resolution 8 which calls for a "Compendium of ISPs".

As RWS-CC is aware, SGFS maintains a "Directory of ISPs" (SD-4). Based on the titles given, there appears to be possible overlap between the "Directory" and the proposed "Compendium". We would like to prevent confusion concerning these two documents and to avoid duplication of information where possible.

Therefore, the SGFS offers to consider modifications to the SD-4 to accommodate the needs of the RWS-CC in cases where there is duplicate information. In other words, information tracked by SGFS can be presented in the SD-4 in modified or additional forms. SGFS invites the RWS-CC to provide to the SGFS its requirements for the "Compendium of ISPs" in order that SGFS may determine what, if any, changes it can make to the SD-4 to satisfy these requirements.
