

Subject: Review of SGFS Issues List (SGFS/N1023)  
 Status: For review by the SGFS Authorized Subgroup Meeting,  
 New Orleans, December 1994  
 Source: Editor of the SGFS Issues List.

Review of open issues:

- Issue 2 Protocol profile testing methodology  
 Current status: waiting for the update of TR 10000-2 to include normative reference to ISO/IEC 9464.  
 Discussion: TR 10000-2:1994 contains normative references to ISO/IEC 9646-6:1994 and ISO/IEC 9646-7:1994.  
 Proposal: Close the issue.
- Issue 4 Conformance  
 Current status: waiting for the update of TR 10000-2 to include normative reference to ISO/IEC 9464.  
 Discussion: TR 10000-2:1994 contains normative references to ISO/IEC 9646-6:1994 and ISO/IEC 9646-7:1994.  
 Proposal: Close the issue.
- Issue 10 PICS Proforma instructions and Annex C of TR 10000-1  
 Current status: waiting for the update of TR 10000-2 to include normative reference to ISO/IEC 9464. When this is done, Annex C can be removed from TR 10000-1.  
 Discussion: TR 10000-2:1994 contains normative references to ISO/IEC 9646-6:1994 and ISO/IEC 9646-7:1994, Annex C of TR 10000-1 is removed.  
 Proposal: Close the issue.
- Issue 12 Profile qualifiers and orthogonal functions  
 Current status: The issue was related to taxonomy for Managed Objects.  
 Discussion: The US proposals for the MO taxonomy issue in TR 10000-2 were accepted.  
 Proposal: The issue seem to have faded away, so close the issue.
- Issue 15 Terminology: a choice between AEP and OSE  
 Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.  
 Discussion: with the agreement rached in Cannes and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) this issue can be considered to be resolved.  
 Proposal: Close the issue.
- Issue 19 Taxonomy  
 Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.  
 Discussion: the OSE taxonomy in TR 10000-3 is minimal, and will be changed based on proposals from submitters of ISPs. There is no pre-concieved overall OSE taxonomy.

- Proposal: Close the issue.
- Issue 21 Conformance testing of OSE
- Current status: Open, pending contributions.  
New contributions:  
N982 UK position on ODP conformance testing  
N1004 Liaison statement to SC21/WG1 and SC22/WG15 on Conformance  
N1132 SC22/WG15 Liaison statement on Harmonizing conformance
- Discussion: The OSI conformance is now covered by ISO/IEC 9646, the conformance to APIs shall be based on DIS 13210.
- Proposal: Further study is necessary, issue should remain open.
- Issue 28 Profile Versions and ISP Revisions
- Discussion: Although the proposed text of SGFS/N764 is in principle incorporated in TR 10000-1.3, the issue as described in SGFS/N698 still seems to exist. New example: the old and new Directory ISPs.
- Proposal: Keep open, for discussion in New Orleans.
- Issue 29 Cultural Elements in ISP and its Taxonomies
- Current status: Liaison statements with SC22/WG15 were exchanged on this topic.
- Discussion: New contributions:  
N1080 SC22/WG15 Resolution on POSIX Profiles  
N1081 Liaison statement to SC22/WG15 on POSIX Profiles  
N1131 SC22/WG15 Liaison statement in Response to SGFS N1081  
N1180 Liaison statement to SC22/WG15 on National Locale Issues
- Proposal: As SGFS does not considers National Profiles to form a special class, the issue should be closed.
- Issue 30 The relationship between OSI and OSE
- Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.
- Discussion: with the agreement reached in Cannes and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) this issue can be considered to be resolved.
- Proposal: Close the issue.
- Issue 31 The scope of OSE profiles
- Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.
- Discussion: with the agreement reached in Cannes and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) this issue can be considered to be resolved.
- Proposal: Close the issue.
- Issue 32 Call for studies

Current status: The French Member Body requested (in SGFS/N737) a study in the areas of Framework for User Requirements, Standard Info Base, Methodology for PAS, Framework for Technology Specifications, Framework for Technology Integration, attributes and methodology.

Discussion: Some of the issues are under study in other groups (i.e., PAS in JTC 1), others have disappeared beyond the horizon (frameworks).

Proposal: Keep open, for discussion in New Orleans.

Issue 33 Relationship of TR 10000 with ODP

Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.

Discussion: with the agreement reached in Cannes and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) this issue can be considered to be resolved.

Proposal: Close the issue.

Issue 34 Taxonomy, Profile Identifiers, and Profiles

Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.

Discussion: with the initial agreement reached in Cannes on the OSE taxonomy, and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) the issue is resolved in principle. Minor additions can be handled as separate contributions to TR 10000-3.

Proposal: Close the issue.

Issue 35 Expansion of the scope of TR 10000-3 to include system software portability

Current status: this issue was open pending the discussions on the scope, methodology and terminology related to the expansion of the scope of TR 10000 from OSI to OSE.

Discussion: with the agreement reached in Cannes and the production of the latest drafts of TR 10000-1.3 (SGFS/N1178) and TR 10000-3 (SGFS/N1181) this issue can be considered to be resolved.

Proposal: Close the issue.

Review of new issues:

Issue 36 Inconsistent interpretation of "m" and "o" in Profile and PICS Proforma Tables. (SGFS/N1134R).

Current status: This issue is in discussion in the RWSs and SC21.

Proposal: Keep open, for discussion in New Orleans.

Conclusion:

It is proposed to close the following issues:

- Issue 2 Protocol profile testing methodology
- Issue 4 Conformance
- Issue 10 PICS Proforma instructions and Annex C of TR 10000-1
- Issue 12 Profile qualifiers and orthogonal functions
- Issue 15 Terminology: a choice between AEP and OSE

Issue 19	Taxonomy
Issue 21	Conformance testing of OSE
Issue 29	Cultural Elements in ISP and its Taxonomies
Issue 30	The relationship between OSI and OSE
Issue 31	The scope of OSE profiles
Issue 33	Relationship of TR 10000 with ODP
Issue 34	Taxonomy, Profile Identifiers, and Profiles
Issue 35	Expansion of the scope of TR 10000-3 to include system software portability

It is proposed to keep the following issues open:

Issue 21	Conformance testing of OSE
Issue 28	Profile Versions and ISP Revisions
Issue 32	Call for studies
Issue 36	Inconsistent interpretation of "m" and "o" in Profile and PICS Proforma Tables
